# INDEX TO VOLUME 1

Adrenal activity affected by restraint, 372
  fear, 372
Age, decision time, 208
Aging, spontaneous skin potential, 273
Agression
  adrenal activity, 372
  systolic blood pressure, 97
  vascular processes, 207
Algometer, pressure, 307
Alpha-blocking
  conditioning, 376
  GSR, 96
Alpha rhythm, heart rate, 248
Amphetamine, sleep cycle, 208
Amusement, epinephrine, 205
Amygdaloid after-discharge, GSR, 202
Analog computer, moder of GSR, 202
Anticipatory response
  acquisition curve, 294
  orienting response, 295
  type of conditioned response, 291
Anxiety
  autonomic balance, 269
  eye-blink conditioning, 307
  heart rate, 201
  manifest, and plasma hormone, 205
  non-avoidance conditioning, 211
  Taylor Manifest Anxiety Scale, 204
Arousal
  conditioned response, 212, 227
  conflict, 97
  decision making, 97
  measured by EEG and HR, 247
  orienting response, 163
Atropine, skin resistance, 63
Attitudinal factors, relation between conditioning and personality, 307
Auditory feedback, heart rate, 192
Auditory stress, sleep deprivation, 92
Automatic analyzer, measure of GSR, 308
Autonomic balance
  influenced by anxiety, 269
  measured by $\bar{A}$, 267
Autonomic lability, 273
Autonomic nervous system (ANS)
  amusement, 206
  epilepsy, 376
  law of initial value, 79
  locus for poor differentiation, 289
  response persistence, 202
Autonomic response specificity, 204
Autonomic responsivity, instructional set, 67
Autonomic stability, 273
Aversive threshold, measured by titration schedule, 92
Avoidance behavior, gastrointestinal behavior, 204

Biological rhythms
  diurnal, 93
  review of publications, 127
Blindness, simulated, and GSR, 96
Blood flow, rheoplethysmography, 254
Blood pressure (BP)
  casual arterial, 96
  displayed by peak sampling, 198
  measurement variability in mental patients, 119
  mecholyl, 115
  non-avoidance conditioning, 209
Body temperature
  monitored by telemetry system, 306
  time estimation, 93

Cardiotachometer, heart rate recording, 111
Cardiovascular change, sensory stimuli, 204
Casual arterial blood pressure, neuroticism, 96
Central nervous system (CNS), arousal, 307
Cerebral cortex, evoked responses during sleep and waking, 373
Chlorpromazine, amusement, 205
Concentric disk electrode, impedance reduction in shock stimulation, 151
Conditioned response
  acquisition curve, 291
  anticipatory, 291
  arousal, 212, 227
  latency, 291
  motor, *see* Motor conditioning
  non-specific, 210, 228
  orienting response, 291, 293, 294
Conditioning
  alpha-blocking, 376
  eye-blink, 307
  non-avoidance, 209–211, 220, 222

Conditioning—(*Continued*)
reflex salivation, 299
two-phase process, 229
Conflict, arousal, 97
Cumulative recorder, 364
Cyclic cardiac activity, computer programs, 111
Cyclic phenomena, *see* Biological rhythms

Decision making, arousal, 97
Decision time, EEG, 208
Depressants, effect on reaction time, 376
Depression, and gastric secretion, 203
Differentiation
in motor conditioned response, 209
in psychology and physiology, 282
Digital computer, heart rate, 111
Diurnal rhythm, sleep deprivation, 93
Drive, body systems, 210

Ego strength, response stereotypy, 142
Electric shock, titration schedule, 92
Electrocardiography (EKG)
CNS arousal, 307
electrode system, 174
EMG, 237, 239
monitored by telemetry system, 306
source for heart-beat signal, 192
Electrodermal response, measurement, 26
Electrode system, impedance pneumography, 174
Electroencephalography (EEG)
age, 98
CNS arousal, 307
DC recordings, 306
decision time, 208
epilepsy, 376
H-reflex, 377
inter-area relationships, 337
measurement for arousal, 247
monitored by telemetry system, 306
orienting response, 163
paroxysmal activity, 305
simulated space flight stresses, 375
sleep in rats, 96
Electromyography (EMG)
EKG, 237, 239
motivation, 98
muscle action potential, 277
response reinforcement, 92
Electronics circuits, digital logic, 101
Epilepsy, autonomic, EEG, and behavioral factors, 376
Epinephrine, response to mecholyl, 116
Ethnic differences, electric shock, 241
Excitation, physiological responses, 31
Exsanguination, skin potential, 61
Extinction, in non-avoidance conditioning, 210, 220, 222
Extraversion, eye-blink conditioning, 307
Eye-blink conditioning, personality, 307

Fear, adrenal activity, 372
Fiber optics, 260
Field dependence, differentiation, 282
Field effect transistor, measured by accumulated voltage, 364
Field independence, differentiation, 282
Finger blood volume (BV), orienting response, 311
Finger pulse volume (PV)
instructional sets, 67
mental patients, 119
orienting response, 311
Finger sweating (FS)
incentive, 231
palmar conductance, 238, 239
racial differences, 232, 238
Flash fusion, noise, 94
Frontalis, muscle activity in hypnosis, 206
Frustration, vascular processes, 206

Galvanic skin response (GSR)
adaptation and different stimuli, 337
alpha-blocking, 96
changes in, 31
CNS, 306
conditioning, 94, 291
conductance, 31
differentiation, 283
endosomatic, 48
epidermal component, 39
instructional set, 67
law of initial value, 79
long term retention of conditioned, 374
measured by automatic analyzer, 308
measurement, 26
monitored by telemetry system, 306
motor performance, 73
non-specific and specific, 327
novelty situations, 93
orienting response, 166, 311
palmar, 39
racial differences, 322
simulated blindness, 96
skin cooling, 308
skin potential, 308
stimulus specificity, 39
testing visual defects, 96
Gastric secretion, depressive responses, 203
Girth (circumference) plethysmography, 257

Habit strength, body systems, 210
Habituation, GSR conditioning, 291, 293
Heart rate (HR)
  alpha activity, 248
  arousal, 248
  ego strength, 142
  EMG, 239
  function of respiration changes, 376
  hypnosis, 206
  incentive levels, 235
  induced anxiety, 201
  instructional set, 67
  law of initial value, 79
  learned variability stabilization, 330
  measured by computer program, 111
  mental patients, 119
  motor performance, 73
  non-avoidance conditioning, 209
  orienting response, 165, 167, 311
  palmar conductance, 238
  paroxysmal EEG activity, 305
  signaling instrument, 192
  variability, 322, 334
Heat, environmental, and pulse rate, 93
Hippocampus, electrical activity, 304
H-reflex (electrically induced reflex), 377
17-Hydroxycorticosteroid (17-OCHS), affected by restraint, 372
Hypnosis
  emotions, 206
  simulated, 206

Idiosyncrasy, within animals, 223
Impedance plethysmography, 255
Incentive levels, finger sweating, 231
Instructional set, autonomic responsivity, 67
Ionized air, behavioral effects on rats, 347

Lability, autonomic, 273
Latency
  conditioned response, 291
  electrotonus, 320
  stimulus intensity, 320
Law of initial value (LIV)
  autonomic variables, 79
  gastric activity, 204
  heart rate, 171
  measurement of change, 368
Learning
  molar and molecular approaches, 372
  neurochemistry, 372
Lykken zinc electrodes, modified design, 88

Maze learning, affected by ionized air, 347
Mecholyl
  epinephrine, 116
  personality dimensions, 115
  reactions, 115
Microelectrode studies, GSR, 308
Microvibrations, resonance theory, 95
Monkeys, adrenal activity under restraint, 372
Motivation, EMG, 98
Motor conditioning
  non-avoidance response, 209
  under paralysis, 307
Motor impulsivity, autonomic activity, 73
Muscle action potential (MAP), 277

Nervous system
  autonomic, *see* Autonomic nervous system
  central, arousal, 307
  parasympathetic, 267
Neurochemistry, and learning, 372
Neuroticism
  casual arterial blood pressure, 96
  eye-blink conditioning, 307
Neurotics, muscle activity, 305
Noise, effect on flash fusion, 94
Non-avoidance conditioning, 209–211, 220, 222
Norepinephrine, response to mecholyl, 116

Orienting response (OR)
  anticipatory response, 295
  arousal, 163
  autonomic components, 311
  conditioned response, 291, 293, 294
  habituation, 163

Pain threshold, 307
Palmar conductance (PC)
  finger sweating, 238, 239
  heart rate, 238
  incentive levels, 235
  racial differences, 232, 238
Palmar sweat
  decision making, 97
  digital, measurement, 371
Parasympathetic nervous system, 267
Pavlovian theory, effect of drugs on reaction time, 376
Peak sampling, simplified approach, 198
Perception, sensitivity and vigilance in amputee children, 375
Personality, adjustment to chemical stress, 115
Photo-plethysmography, 257
Plasma hormone, manifest anxiety, 205

Plethysmography
girth, 257
impedance, 255
paroxysmal activity, 305
techniques, 253
Pneumograph, electrode system, 174
Polygrams, digital scanner, 195
Pressure algometer, 307
Psychophysiology
definition, 90
goals and methods, 8
Psychlorhythmics, review of publications, 127
Pulse rate, environmental heat, 93

Racial differences
effects on PC and FS, 232, 238
in resting skin conductance, 322
Rapid eye movement (REM)
amphetamine, 208
in sleep, 377
Reaction time
age, 98
effect of depressants and stimulants, 376
Respiration
CNS arousal, 307
measurement in mental patients, 119
monitored by telemetry system, 306
orienting response, 163, 165
paroxysmal activity, 305
Respiration rate (RR)
effect on heart rate, 376
heart rate variability, 322, 334
in unrestrained rat, 360
LIV, 79
non-avoidance conditioning, 209
Response, conditioned, *see* Conditioned response
Response frequency, covert operant, 92
Response persistence, 202
Response reinforcement, 92
Response specificity
autonomic, 204
GSR, 31
Response stereotypy, 142
Responsivity, autonomic, instructional set, 67
Rheoplethysmography, 254

Salivation, conditioned response, 299
Scanner-digitizer, for reading polygraph records, 195
Schizokinesis
Gantt's theory, 202, 226, 374
Mowrer's theory, 226
Schizophrenics
flash fusion threshold, 94
muscle activity, 305
physiological variability, 119
Sensory stimuli
EEG phase relationships, 337
heart rate, 204
Shock
constancy control, 151
electric, estimates, 151
electrode, pain simulation, 296
Sialometer, improved model, 299
Sinus arrhythmia
detected by cardiotachometer, 111
heart rate, 171
Skin conductance
GSR, 30
mental patients, 119
Skin potential (SP)
age and vigilance, 272
bodily excitation, 31
GSR, 308
hypnosis, 206
independence from sweating, 55
measurement, 26
orienting response, 311
Skin resistance
bodily excitation, 31
ego strength, 142
independence from sweating, 55
measurement, 26
paroxysmal activity, 305
skin cooling, 308
Skin temperature, LIV, 79
Skin vibration, normal and psychiatric patients, 305
Sleep
amphetamine, 208
rat, and excitability changes, 97
review of publications, 127
Sleep deprivation
after-effects, 93
auditory stress, 92
diurnal rhythm, 93
stage four, 305
Stability, autonomic, 273
Stereotypy
dogs, 223, 225
ego strength, 142
Stimulants, effect on reaction time, 376
Stimulus
ideational, and EEG phase relationships, 337
intensity and autonomic responses, 311

intensity and response magnitude, 319
repetition of and orienting response, 316
Stimulus-response specificity, GSR, 309
Stomach-motility, instructional sets, 67
Stress
auditory, sleep deprivation, 92
chemical, 115
simulated space flight, 375
Sweat gland activity
GSR, 39
skin potential and resistance, 55
Systolic blood pressure, aggression, 97

Taylor Manifest Anxiety Scale (TMAS), plasma hormone, 204
Telemetry
CNS, arousal, 307
multi-channel, improvements, 306
Time, estimation, and environmental heat, 93
Titration schedule, aversive threshold, 92
Tracking system, dual modality, 183
Tracking task, motivation and EMG, 98

Vasoconstriction
frustration, 207
orienting response, 163, 165, 311
Vision
complexity, and GSR, 93
detection of defects, 96
incongruity, and GSR, 93
sensitivity, measured by MAP, 278

Wave-spike discharge, epileptics, 306

# PSYCHOPHYSIOLOGY

# CONTENTS OF VOLUME 1

## No. 1, JULY 1964

Editorial. ALBERT F. AX ..... 1
Society Announcements ..... 3
Psychophysiology, Yesterday, Today and Tomorrow. CHESTER W. DARROW ..... 4
Goals and Methods of Psychophysiology. ALBERT F. AX ..... 8
Problems in Measurements of Electrodermal Phenomena—Choice of Method and Phenomena—Potential, Impedance, Resistance. T. W. FORBES ..... 26
The Rationale for Treating the Change in Galvanic Skin Response as a Change in Conductance. CHESTER W. DARROW ..... 31
Two Galvanic Skin Response Effector Organs and Their Stimulus Specificity. ROBERT EDELBERG AND DAVID J. WRIGHT ..... 39
Problems in the Analysis of the Endosomatic Galvanic Skin Response. DONALD HOLMQUEST AND ROBERT EDELBERG ..... 48
The Partial Independence of Skin Potential and Skin Resistance from Sweating. R. C. WILCOTT ..... 55
The Effects of Instructional Sets on Autonomic Responsivity. RICHARD A. STERNBACH ..... 67
Spontaneous Heart Rate and GSR Changes as Related to Motor Performance. RICHARD F. DOCTER, JACQUES W. KASWAN AND CHARLES Y. NAKAMURA ..... 73
Differential Effect of the Law of Initial Value (LIV) on Autonomic Variables. DAVID J. HORD, LAVERNE C. JOHNSON, AND ARDIE LUBIN ..... 79

*Instrumentation*

A Modified Design for the Lykken Zinc Electrodes. STEPHEN KAPLAN .. 88

*Communications*

Toward a Definition of Psychophysiology. JOHN A. STERN ..... 90
*Abstracts of the Literature* ..... 92

## No. 2, OCTOBER 1964

Basic Operations of Digital Logic. C. C. BROWN AND P. R. THORNE ..... 101
Computer Identification and Measurement of Cardiac Activity. N. T. WELFORD, BEATRICE LACEY AND C. PECKHAM ..... 111
Interrelationship Between Blood Pressure Responses to Mecholyl and Personality Variables. L. BERGER ..... 115
An Investigation of the Variability in Repeated Psychophysiological Measurements in Tranquilized Mental Patients. C. W. ACKER ..... 119
Psychorhythmics—A Special Review. J. BROZEK ..... 127

Ego Strength and Response Stereotypy. R. ROESSLER, N. GREENFIELD AND A. ALEXANDER ..... 142
Controlled Physical and Subjective Intensities of Electric Shock. B. TURSKY AND P. D. WATSON ..... 151
Habituation of the Orienting Response in Alert and Drowsy Subjects. D. G. MCDONALD, L. C. JOHNSON AND D. J. HORD ..... 163
A Long-Term Electrode System for Electrocardiography and Impedance Pneumography. J. L. DAY AND M. W. LIPPITT, JR. ..... 174

*Instrumentation*

A Dual Modality Tracking System. J. F. DAVIS AND W. J. MUNDL ..... 183
An Instrument for Signaling Heart Rate to Unrestrained Human Subjects. C. C. BROWN AND P. R. THORNE ..... 192
A Simple Scanner-Digitizer for Reading Polygraph Records. D. M. PARKER ..... 195
A Simplified Approach to Peak Sampling. P. R. THORNE ..... 198
*Abstracts of the Literature* ..... 201

No. 3, JANUARY 1965

The Evaluation of Autonomic and Motor Components of the Nonavoidance Conditioned Response in the Dog. R. A. DYKMAN, R. L. MACK, AND P. T. ACKERMAN ..... 209
Finger-Sweat Prints in the Differentiation of Low and High Incentive. R. B. MALMO ..... 231
Ethnic Differences Among Housewives in Psychophysical and Skin Potential Responses to Electric Shock. R. A. STERNBACH AND B. TURSKY ..... 241
The Relation of Amplitude of Alpha Rhythm to Heart Rate. W. W. SURWILLO ..... 247
Techniques of Plethysmography. C. C. BROWN, D. B. GIDDON, AND E. D. DEAN ..... 253
Changes in Autonomic Balance During Phasic Anxiety. D. B. D. SMITH AND M. A. WENGER ..... 267
The Relation of Frequency of Spontaneous Skin Potential Responses to Vigilance and to Age. W. W. SURWILLO AND R. E. QUILTER ..... 272
Motor Response and Muscle Action Potential in the Measurement of Sensory Threshold. S. P. FJELD ..... 277
Physiological Concomitants of Psychological Differentiation. R. J. COURTER, R. A. WATTENMAKER, AND A. F. AX ..... 282
A Re-Analysis of GSR Conditioning. D. G. MCDONALD AND L. C. JOHNSON ..... 291

*Instrumentation*

A Concentric Shock Electrode for Pain Stimulation. B. TURSKY, P. D. WATSON, AND D. N. O'CONNELL ..... 296
An Improved Sialometer. B. W. FEATHER ..... 299
*Abstracts of the Literature* ..... 304

No. 4, April 1965

Autonomic Components of Orienting Behavior. TADAO UNO AND WILLIAM W. GRINGS ..... 311
Eccrine Sweat Gland Activity and Racial Differences in Resting Skin Conductance. LAVERNE C. JOHNSON AND MARVIN M. LANDON ..... 322
Learned Stabilization of Cardiac Rate. MICHAEL HNATIOW AND PETER J. LANG ..... 330
Interarea Electroencephalographic Phase Relationships Following Sensory and Ideational Stimuli. CHESTER W. DARROW AND RONALD G. HICKS ..... 337
Behavioral Effects of Ionized Air on Rats. R. A. DUFFEE AND R. H. KOONTZ ..... 347

*Instrumentation*

Measurement of Respiratory Rate in the Unrestrained Rat. EUGENE EISMAN ..... 360
An Instrument for Producing Accumulative Tracings on Polygraph Recorders. P. R. THORNE ..... 364

*Communications*

On the Law of Initial Value and the Measurement of Change. WALTER W. SURWILLO AND DAVID L. ARENBERG ..... 368
*Abstracts of the Literature* ..... 371
*In Memoriam* ..... 378
*Notice of Appointment* ..... 378
*Announcement* ..... 378
*Announcement of Annual Meeting* ..... 379
*Index* ..... 381
